What is SILENT VOICE?

SILENT VOICE is a user-friendly Windows application that lets you generate natural-sounding speech from text, using advanced voice cloning.

It supports any text in multiple languages and can use your own cloned voice or select from various pre-made voices.

Key Features

- **Text-to-speech conversion:** Instantly turn any text into high-quality audio.

- **Voice cloning:** Use your own custom voice or any supported voice from ElevenLabs.
- **Multilingual support:** Read text aloud in multiple languages and accents.
- **Simple drag-and-drop interface:** Easy to use for anyone.
- **No technical skills required.**

System Requirements

- **Operating System:** Windows 10 or newer (64-bit recommended)
- **Internet Connection:** Required for voice synthesis via ElevenLabs API
- **ElevenLabs Account:** Needed for custom/cloned voices (free tier available)
- **No need external installations or extra dependencies**

Quick Start Guide

1. Creating or Cloning a Voice with ElevenLabs

a) Create an Account

- Go to <https://elevenlabs.io/> and create a free account.

b) Clone Your Voice

- After logging in, click “VoiceLab” or “Create Voice.”
- Upload a sample of your voice (usually 1–2 minutes of clear speech, WAV or MP3 format).
- Follow the instructions to finish the voice cloning process.

c) Wait for Processing

- Voice cloning takes a few minutes.
- You’ll be notified by email or inside the ElevenLabs dashboard when your voice is ready.

2. Finding Your Voice ID on ElevenLabs

a) Go to the Voices List

- After logging in, click “Voices” in your ElevenLabs dashboard.

b) Select the Cloned Voice

- Find the voice you created or cloned.

c) Copy the Voice ID

- Click on the desired voice to open its details.
- You will see a “Voice ID” — a string of letters and numbers (e.g., MF5jS3K8J2C6P1Tz9N8L).
- **Copy this Voice ID** to your clipboard.

3. Configuring SILENT VOICE

a) Paste Your API Key

- In your ElevenLabs dashboard, go to “Profile” or “API” section.
- Copy your personal API key.
- Open the SILENT VOICE folder and paste the API key the box.

b) Add Your Voice ID

- When using SILENT VOICE, you’ll be asked for the Voice ID.
- **Paste the Voice ID** you copied from ElevenLabs.

4. Using SILENT VOICE

- **Enter or paste your text** in the main window.
- **Select your voice** (by entering the Voice ID, or choosing a pre-set one).
- **Click “Generate Audio.”**
- The app will contact ElevenLabs and generate an audio file of your text, using your chosen voice.
- The output audio (usually WAV or MP3) is saved to your Desktop or a folder you select.

FAQ

Do I need to pay for ElevenLabs?

- ElevenLabs has a free tier for testing, but usage limits may apply. Paid plans unlock more features and more characters per month.

Can I use celebrity or synthetic voices?

- Only use voices you have permission for. Cloning someone else’s voice without consent is not ethical or legal.

Can I use other people’s Voice IDs?

- Only use your own Voice IDs or those provided for public/official use.

Is my voice data safe?

- Voice data is processed and stored by ElevenLabs under their privacy policy.

Troubleshooting

- **Error: “Invalid API Key”**
 - Double-check that you copied your full API key into `elevenlabs_key.txt`.
- **Error: “Voice ID not found”**
 - Make sure you copied the correct Voice ID from your ElevenLabs dashboard.
- **Audio not generated**
 - Check your internet connection and your ElevenLabs account usage limits.
